

# HEAVY DUTY CONTINUOUS TOOL RAIL USING ALUMINUM TRACK

While ECONOLINE Extruded Aluminum Track will not fit into the "coupler" on the top of WS50-UFxx BENCH LEG BASES, it fits perfectly into the sleeve on the bottom plate (as it does on all other mounting bases). It's not cataloged, but the bottom plates, both 30" and 36", are available separately. Order model #WS50-UF30B (30") or #WS50-UF36B (36"). Also available separately is the LEG BOX, model #WS50-SCB. List prices below.

\* Leg Box bolt to aluminum upright and to conveyor or bench leg, greatly increasing structure rigidity.
